DETAILED ACTION

1. In response to the Office action mailed November 28, 2007 the Amendment has been received on February 18, 2008.

Claims 1-4, 6-10 have been amended.

Claim 5 has been canceled.

Claims 12-20 have been newly added.

Claims 1-4 and 6-20 are currently pending in this application.

Claim Objections

2. Claims 12-17 are objected to because of the following informalities: the newly added claims 12-17 are depending on the canceled claim 5. Appropriate correction is required.

Claim Rejections - 35 USC § 101

3. Claims 1-4, 6-9 and 11-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-4, 6-9 and 11-20 are directed to neither a "process" nor a "machine," but rather embraces or overlaps two different statutory classes of invention set forth in 35 U.S.C. 101.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4, 6-9 and 11-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claims 1-4, 6-9 and 11-20 claim both an apparatus and the method steps of using the apparatus is indefinite under 35 U.S.C. 112, second paragraph.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-4, 6-9 and 11-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Ueki et al. (US Patent 6,377,656 B1).

With respect to claims 1-4, 6-9 and 11-20, Ueki teaches an adjusting device for adjusting imaging parameters of an X-ray apparatus, comprising: a user interface (10 and 11) by means of which, with the aid of a preliminary image, a user specifies an image region of interest (ROI) and a visibility criterion desired for this image region; a data processing (109) device calculating the imaging parameters of the X-ray apparatus, and controlling the X-ray apparatus on the basis of the calculated, adjusted

imaging parameters (see abstract; Figs. 1 , 3, 6, 7B, 9A and 9B; column 5, lines 36-55; column 7, lines 15-47; column 9, lines 30-35; column 10, lines 42-59).

Allowable Subject Matter

8. Claim 10 is allowed.

9. The following is a statement of reasons for the indication of allowable subject matter:

With respect to claim 5, prior art fails to teach or make obvious a method of adjusting imaging parameters of an X-ray apparatus, comprising the steps of: generation of a preliminary image with starting values for the imaging parameters; interactive stipulation of an image region of interest and of a visibility criterion desired for this image region; calculation of adjusted imaging parameters for the X-ray apparatus, during the use of which the predetermined visibility criterion is achieved for the predetermined image region; and controlling the X-ray *apparatus* based on the calculated, adjusted imaging parameters as claimed.

Response to Arguments

10. Applicant's arguments with respect to claims 14- and 6-20 have been considered but are moot in view of the new ground(s) of rejection.
